SUMMARY

I am a Frontend Engineer with nearly 4 years of experience in web development. Driven by a passion for continuous learning and improvement, I actively stay updated on the latest industry trends.
My goal is to leverage my technical expertise to develop innovative solutions that meet the ever-changing demands of the tech landscape.

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript
Frameworks/Platforms:
- Angular, ReactJs, HTML5/CSS3, SCSS, TailwindCSS
- Webpack, EsBuild, Vite
- NodeJs, ExpressJs, NestJS, MongoDB

Others:
- OOP, SOLID, Reactive Programming, Functional Programming
- REST API, GraphQL
- Git, Github, Figma, Bitbucket, Jira, Postman

DevOps & Deployment: Docker, AWS
Soft skills: English, Quick learning, Problem solving, Adaptability, Flexibility

PROFESSIONAL EXPERIENCE

VNG Corporation - Software Engineer   Jun 2023 - Present

Projects:
- **XHunt:** XHunt is a comprehensive solution designed for recruitment process. It is an integral part of the Human Resource Management system, focusing on attracting, managing, hiring, and retaining talented and qualified personnel.
- **XFile:** A versatile digital asset and file management platform supporting multiple tenants, offering seamless interaction, permission control, and secure collaboration

Team size: 8
Responsibility:
- Developed and deployed two projects using Angular 16+, integrating Restful API, GraphQL, and AWS
- Collaborated closely with Business Analysts, Database, and Backend teams to analyze requirements and implement features
- Seamlessly migrated current projects from Angular 12 to Angular 16+
- Enhanced application performance by leveraging OnPush change detection, Signal, Standalone and Service Workers & PWAs, resulting in a significant reduction in initial bundle size and improved runtime efficiency
- Researched and implemented NX - Monorepo architecture to streamline development and reduce coding time across projects
- Hosted two internal technical seminars: Angular Architecture and AWS CloudWatch
- Weekly reports

Technical proficiencies:
- **Domain:** File Storage, HRM
- **Tech stack**:
  - Javascript, Typescript, HTML5/CSS3, TailwindCSS
  - Angular 16+, Angular CDK, Angular Material, Angular AgGrid, Standalone, Signal, Dependency Injection , Deferrable Views, Service Workers & PWAs, Ngrx Signal Store
  - NX - Monorepo, Restful API, GraphQL - Hasura, AWS

Ecotruck - Front-end Engineer

May 2022 - May 2023

Projects:
- **Ecotruck Center:** This is an internal application that facilitates connections between Ecotruck employees, merchants, and vendors, streamlining the logistics and trucking processes for efficient delivery management

Team size: 6

Responsibility:
- Analyzed and implemented requirements from Business Analysts.
- Estimated tasks using story points, tracked burn rate, and maintained focus on team objectives and deadlines.
- Collaborated closely with designers to enhance UI/UX, ensuring a seamless and intuitive user experience.
- Worked with backend teams to ensure seamless API integration.
- Participated in code reviews and feedback to team members to ensure code quality.
- Daily reports

Technical proficiencies:
- **Domain:** Logistics
- **Tech stack**: Javascript, Typescript, Angular 12, Angular Material, TailwindCSS, Restful API

Appvity - Front-end Engineer

Jan 2021 - May 2022

Projects:
- **eTask:** eTask is a task management tool that integrates with Microsoft Teams, enhancing team collaboration. It allows efficient work organization and deadline management through tools like Dashboard, Table, Calendar, Gantt, and Kanban boards

Team size: 10

Responsibility:
- Resolved bugs and developed new features following Business Analyst (BA) specifications.
- Collaborated with designers to optimize UI/UX for improved user engagement.
- Worked closely with backend teams to ensure seamless API integration.
- Daily reports

Technical proficiencies:
- **Domain:** Task management
- **Tech stack**: Javascript, Typescript, Angular 12, Angular Material, Bootstrap, Restful API, Kanban, Angular Syncfusion
